SUMMARY

Computer Science Engineering student with a strong foundation in Python, SQL, operating systems, and networking fundamentals. Experienced in developing software applications and troubleshooting technical issues. Actively involved in volunteering and organizing events for freshers, demonstrating strong communication, teamwork, leadership, and coordination skills. A quick learner with a problem-solving mindset and an interest in IT operations and technical support.

EDUCATION

Ballari Institute of Technology and Management, *B.E. in Computer Science and Engineering* 2023 – 2027
CGPA: 8.49 / 10.0

TECHNICAL SKILLS

Languages & Core:
Python,Object Oriented Programming,SQL

Databases
MySQL,MongoDB

Tools
Git, GitHub,IDE

Core Computer Science
Operating Systems Fundamentals,Networking Fundamentals

Operating Systems
Windows

VOLUNTEERING& LEADERSHIP

- Volunteered in organizing and coordinating events for freshers.
- Supported event planning, coordination, and student engagement.
- Collaborated with team members to ensure smooth execution of activities.

ACHIEVEMENTS

Top 25 Teams – Neo Nexus Hackathon
Recognized for an AI-in-Education solution competing nationally.

Top 10 – Smart India Hackathon (Internal Round)
Selected for building an innovative and technically robust solution.

National AI/ML Hackathon – IIT Hyderabad
Presented IntelliCredit as Team Omnitrix, an AI-driven Credit Risk Assessment solution for intelligent financial risk analysis.

Meta PyTorch OpenEnv Hackathon – Scalar School of Technology
Competed as Team Deep Learner.

PROJECTS

EduGenie Hyper-Personalized AI Tutoring Platform 2025 – 2026

- Developed an AI-powered tutoring platform for personalized question answering and educational content generation.
- Implemented document processing and retrieval-based learning for relevant answers from study materials.
- Added voice interaction, gamification, and GPU memory optimization for smoother AI application performance.

IntelliCredit Hub AI-Driven Credit Risk Assessment 2026

- **Developed** an AI-based credit management platform that extracts financial information from business documents and supports automated credit evaluation.
- **Implemented** document processing to extract key financial metrics such as turnover, profit, and debt from uploaded files.
- **Applied** machine learning models to verify corporate information, detect anomalies, and generate risk scores for credit cases.

CERTIFICATIONS

AWS Certified Cloud Practitioner(CLF-02) (Amazon Web Services)

ServiceNow Certified System Administrator(CSA) (ServiceNow)

ServiceNow Certified Application Developer (CAD) (Service Now)
